

New Pre-Press Suite At African Union

Hunter Penrose has begun work on a complete pre-press installation and training programme at the African Union headquarters in Addis Ababa, Ethiopia. The bespoke system includes new ECRM and Kodak equipment with integrated workflow, consumables and operator training.

Coatings For Heatset

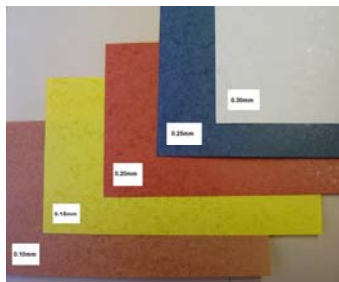

At the request of *Polestar Chromoworks* (UK), Hunter Penrose developed a water-based varnish for use on Jet Web and Scheffer heatset coating units. The special formulations produce a high gloss or silk sheen effect at high speed, adding to our range of aqueous, UV and solvent based coatings and varnishes.

Blanket Sales Hit Another New High!

Sales of 3920 cut blankets set another record for the first 3 months of 2008, led by Heidelberg, Adast, MAN Roland and Goss users.

Large Format hard Blanket Underlays

We have extended the range of Type S calibrated manilla underlays to include MAN Roland XXL and other VLF presses. The new sizes and new 0.80mm and 1.00mm gauges are now available through selected distributors in China, Germany, Russia, Ukraine and South Africa and the extended range will be offered to new dealers at Drupa, where samples can be collected from the Kinyo stand (4A 20).

Clean Dampening On Heidelberg Long Perfectors

Trials in the Middle East produced better density and dot gain with improved drying, reducing ink and water settings by cutting IPA to 6%-8% using FS Perfection Fount. External fount filters (below) further reduced consumption of ink, fount and paper.

Партнерство 5 Лет в Украине

The first truck-load left Hunter Penrose warehouse for Ukraine in June 2003. Since then, our partner *Printing Systems* has become one of the top distributors of equipment and consumables in the market. Picture shows members of the *Printing Systems* consumables and logistics team with David Thomas.

Record Orders For Sponges

Hunter Penrose received orders for 67,000 Hunterpress compressed lithographic sponges in the first quarter of 2008.

Choice Of Web Inks

We now supply Hunterpress Coldset Black in two different levels of viscosity: the standard product designed to be pumped direct from the drum, and a new high-viscosity grade for manual inking.

forget drupa?

Everything is at Hunter Penrose! We're only joking. David Thomas will be at Drupa every day from 1st June until 10th June. If we have not yet made an appointment with you, messages can be left with Kinyo Europe (Stand 4a 20) or on David's mobile +44 7876 232 268.

HUNTER PENROSE

≈THE 50 MOST POPULAR PRODUCTS OF 2007≈

101 UV Gloss	Gloss UV Varnish
102 UV Silk Lustre	Silk Lustre UV Varnish
301 High Gloss	Gloss solvent-based overprint varnish
4010 Wash	Water-miscible blanket wash
