

MATCHPRINT Inkjet 400 proofing solution

The MATCHPRINT Inkjet 400 proofing solution brings the next level of workflow connectivity and color precision to drop-on-demand (DOD) inkjet proofing. The new Kodak-developed solution replaces both INTEGRIS and MATCHPRINT PROOFPRO products.

MATCHPRINT Inkjet is the first DOD proofing solution to be based on powerful Kodak-developed software including innovative screening and calibration technologies, and a new Certified Process for Color Confirmation. Using the same KODAK Proofing Software as the popular VERIS proofer, customers will benefit from excellent color accuracy, enhanced image smoothness, quick calibration tools, and direct connectivity to PRINERGY and BRISQUE workflow software.

Selected features and benefits

- Direct connectivity to KODAK workflow software
- Open connectivity to popular creative and prepress applications
- Enhanced accuracy and proofing precision with smooth vignettes and images
- Same easy-to-use user interface as the popular VERIS proofer
- Quick and accurate printer calibration for consistency proof-to-proof and proofer-to-proofer
- A new Certified Process for Color Confirmation option
- Compatible with both INTEGRIS and MATCHPRINT media
- Support for current and new EPSON STYLUS Pro 7600 and 7800 printers with additional printer types to follow
