## equipment data sheet

printing frame

model ref: Parker PL93TR

### Description

The Parker PL93TR is a flip-top frame with a maximum printing area of 825 x 1079 mm.

The TR model incorporates a device which rotates and masks the lamp when exposure is complete, thereby providing a precise exposure cut-off.

- press button exposure selection - 0 to 999 LED display
- press button program selection - 10 channel
- automatic ignition
- integrated and real time as standard feature
- full/half power switch
- metal halide lamp idles at half power on standby
- automatic cooling increases lamp life
- automatic masking blind and edging brushes for operator safety
