## “PERFECTION” FOUNT FOUNTAIN SOLUTION FOR HIGH SPEED OFFSET

Improves speed and quality of printing with reduction of alcohol and reduction of paper waste.

PERFECTION FOUNT is a modern formulation designed to achieve efficient ink-transfer and effective dampening with low water and alcohol settings at high speed. It is compatible with all modern sheet fed and web presses including heatset.

- Fast Start-Up – Reduced waste of material and time
- Buffered to pH 5.1 to 5.3 – Constant pH under varying dosage conditions
- Precisely controlled ink/water balance – Sharp, controlled dots at extreme screen densities
- High ink-transfer factor – Even, dense solids without heavy loading of ink rollers
- Low water and Alcohol settings – Precise control and economy
- Efficient desensitisation of non-image area – Clean dots, no scumming, fewer press stops
- Removal of calcium salts – Counteracts accumulation of calcium on inking rollers
- Anti-piling agent – Prevents accumulation of paper dust on the blanket

### FS PERFECTION Technical data

Appearance	Pale Blue Liquid
Operating pH	Buffered to pH 5.1-5.3
Dosage range	1.5% - 3%
Addition of Isopropyl Alcohol	0% – max 9% (typically 6% - 8%)
Water Hardness tolerance	DH 4 - 25
Packaging	10 litre, 25 litre, 200 litre plastic containers
