## equipment data sheet

film processor

model ref: AGFA RAPIFLEX 51

### Description

The RAPIFLEX 51 is a front-end processor in the true meaning of the word, with material input and output at the front of the machine. You can simply instal the processor against the wall where it takes up the smallest possible space.

The RAPIFLEX 51 combines a feed table with an integral daylight loader, so there are no problems with visibility and every job is carried out in daylight.

The processor has a well structured and easy-to-use control panel.

### Specification

Length: 80 cm  
Width: 80 cm  
Height: 118 cm

Net weight: 75 kg

Mains voltage: 208-240 VAC 50-60 Hz

Maximum power: 2 KW

Water fitting: ¾ BSP

Drains: 3 x 20 mm

Water consumption: 0 - 4 litres/minute

Capacity dev.tank: 6 litres

Capacity fix tank: 6 litres

Capacity wash tank: 6 litres

Developer temperature setting: 23 - 43°C

Fixer temperature setting: 23 - 43°C

Dryer temperature setting: 30 - 60°C

Film width: 7 - 51 cm

Film length: at least 11 cm

Transport distance - developer: 21.5 cm

Transport distance - fixer: 21.5 cm

Transport distance - wash: 21.5 cm

Dryer distance: 34 cm

Programming range dev. time: 10 - 60 seconds

Programming range transport speed: 126 -21 cm/min

Dry-to-dry with 14 secs dev.time: 63 seconds
